Short description/Contents	This is an introductory course in the field of supply chain management. The aim is to familiarize students with the core concepts and how they are connected to each other. We will cover topics such as: Demand planning, Inventory planning and control, Procurement, Transportation, Warehouse location and operations, Reverse logistics and others.
Assessment/Evaluation	Students need to complete an individual assignment in which they forecast sales for a product, procure raw materials, establish a distribution centre and transport their wares to a set of cities.
Bibliography	<p>Compulsory reading: Paul A. Myerson. 2015. Supply Chain and Logistics Management Made Easy: Methods and Applications for Planning, Operations, Integration, Control and Improvement, and Network Design, 1st ed., Pearson FT Press, ISBN: 978-0133993349</p> <p>Optional reading: Jerry Rudd. 2019. A Practical Guide to Logistics: An Introduction to Transport, Warehousing, Trade and Distribution, 1st edition, Ed. Kogan Page. ISBN: 978-0749486310</p> <p>Joseph Cavinato. 2010.
